

Reports in Power BI

Table of Content

1. Power BI Reports: 3
2. Bookmarks, Buttons and Navigation: 11
3. Customizing the Experience: 19
4. Customize a Report with Q&A: 28

1. Power BI Reports

Course pre-requisites

- Data Visualization in Power BI
- Intermediate DAX in Power BI

Dashboards versus reports

Dashboard

- Tells us about critical business or operational metrics, often in real time
- Lacks interactivity
- Single-view

Reports

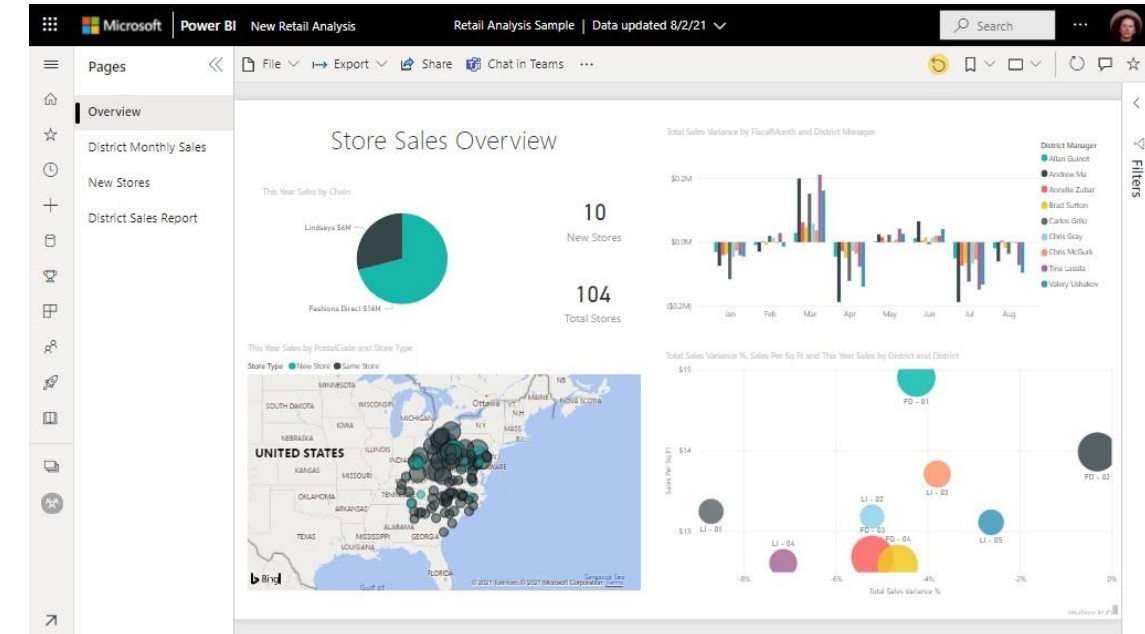

- Provides an application-like experience for users
- Multiple pages and interactive functionality
- The focus of this course

Choosing between dashboards and reports

Choose a dashboard if... Choose a report if...

- You need rapid analysis
- Users have limited engagement opportunities

- You need detailed analysis
- Users are primarily on PC and have a keyboard, mouse, and large screen

Paginated reports

- "Pixel-perfect" report intended for the written page
- Created in the Power BI Report Builder

Tracking CPI of Apparel by region over time

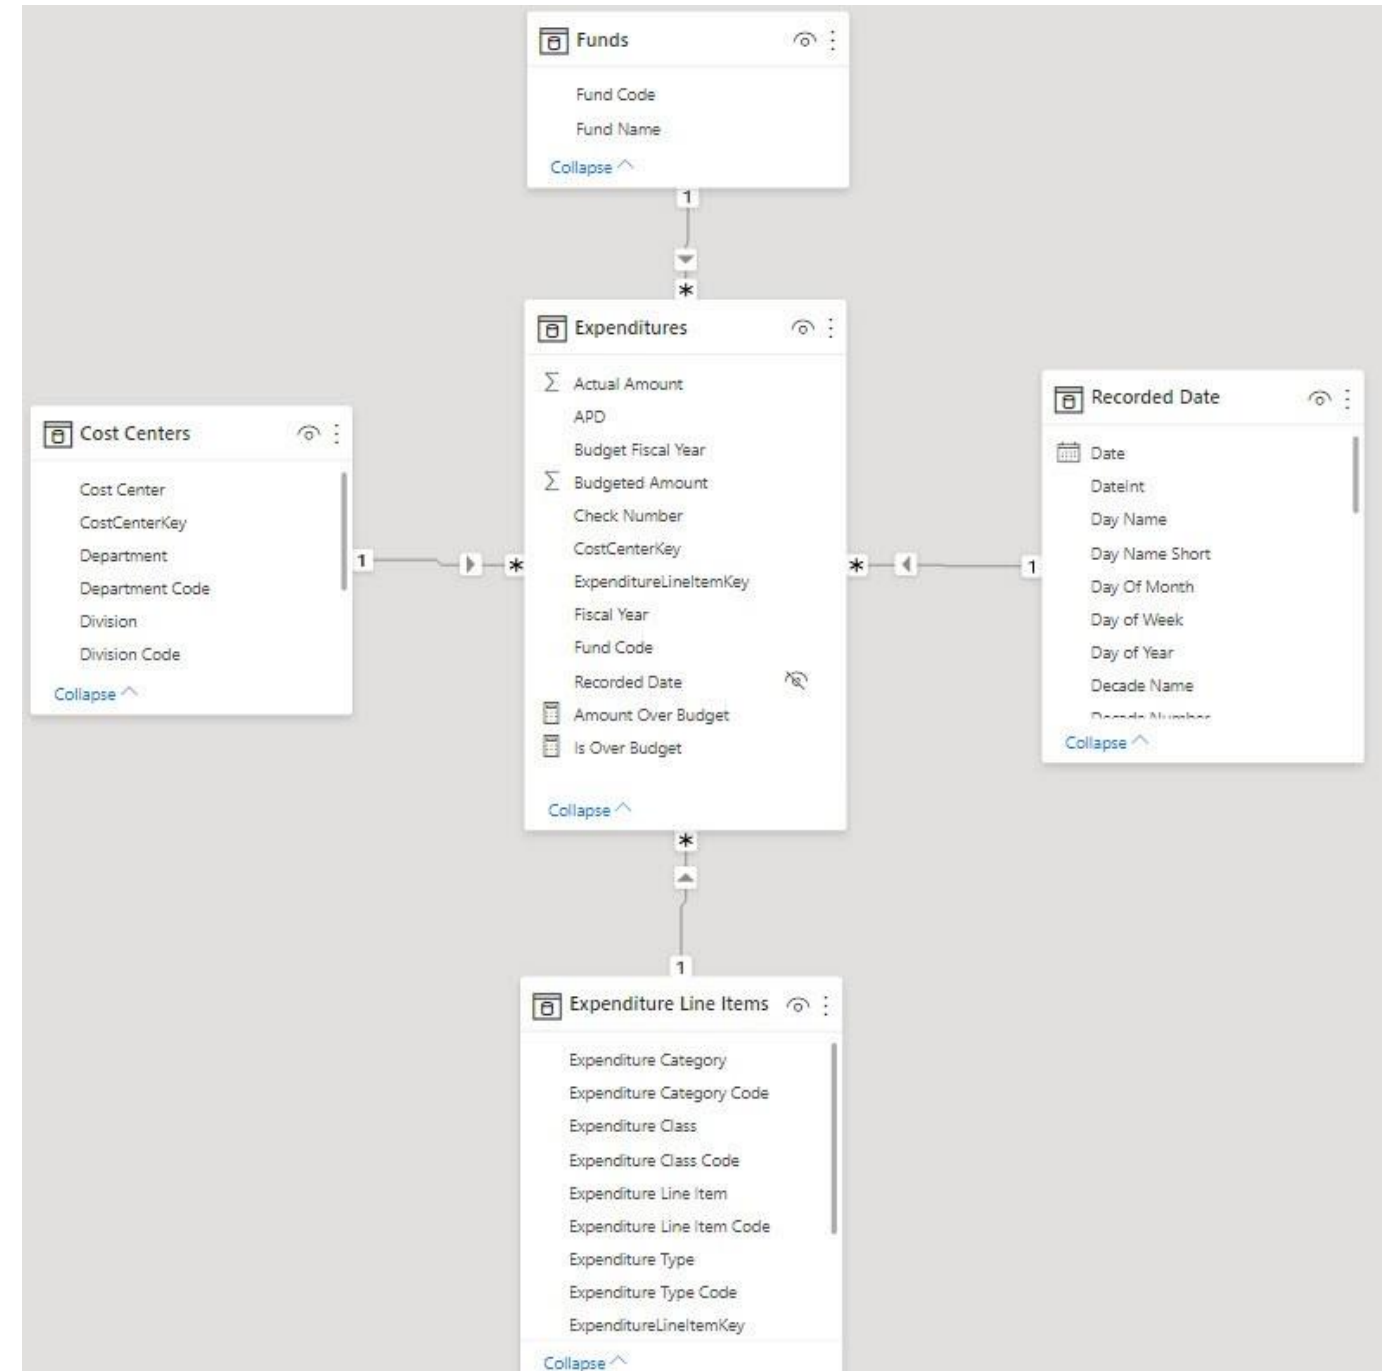

Date	Midwest	Northeast	Size Class A	Size Class B/C	Size Class D	South	U.S. city average	West
1997-01-01	127.00	126.90	119.60		130.10	140.80	129.60	121.00
1997-02-01	130.70	129.80	122.20		129.80	141.90	131.90	122.80
1997-03-01	133.30	132.50	124.50		132.30	144.10	134.50	125.70
1997-04-01	136.40	132.10	125.50		137.30	146.60	136.10	126.80
1997-05-01	135.70	130.90	124.80		136.50	146.40	135.30	125.40
1997-06-01	131.40	128.00	122.00		132.60	143.70	132.40	123.90
1997-07-01	127.70	127.70	120.00		131.40	140.50	130.20	122.40
1997-08-01	129.20	128.10	120.30		130.40	139.10	130.00	120.80
1997-09-01	133.10	133.30	123.20		133.40	140.90	133.00	122.30
1997-10-01	133.80	134.60	124.40		135.20	144.80	134.90	123.30

The end goal

- Multiple pages with drillthroughs, bookmarks, and navigation buttons
- Interactive design: animations, highlighting and states
- Question and Answer capabilities

Wake County watchdog data

- Part of Wake County Open Data
- Tracks budgets and expenditures for Wake County, North Carolina
- Includes fiscal years 2017-2019
 - July 1st - June 30th

Demo

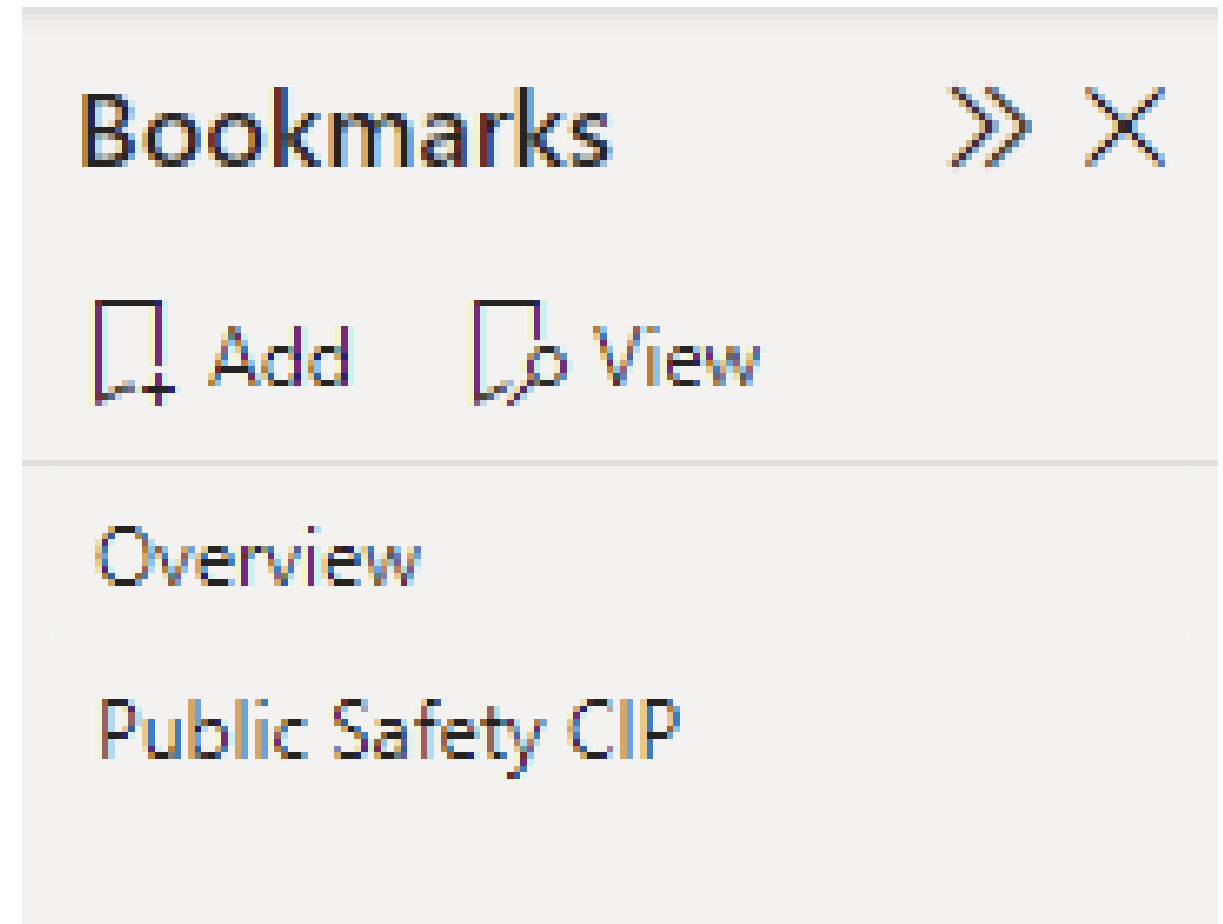

2. Bookmarks, Buttons and Navigation

Navigation and stories

- Stories benefit from structure
- Structured navigation helps tell the story for reports

Bookmarks

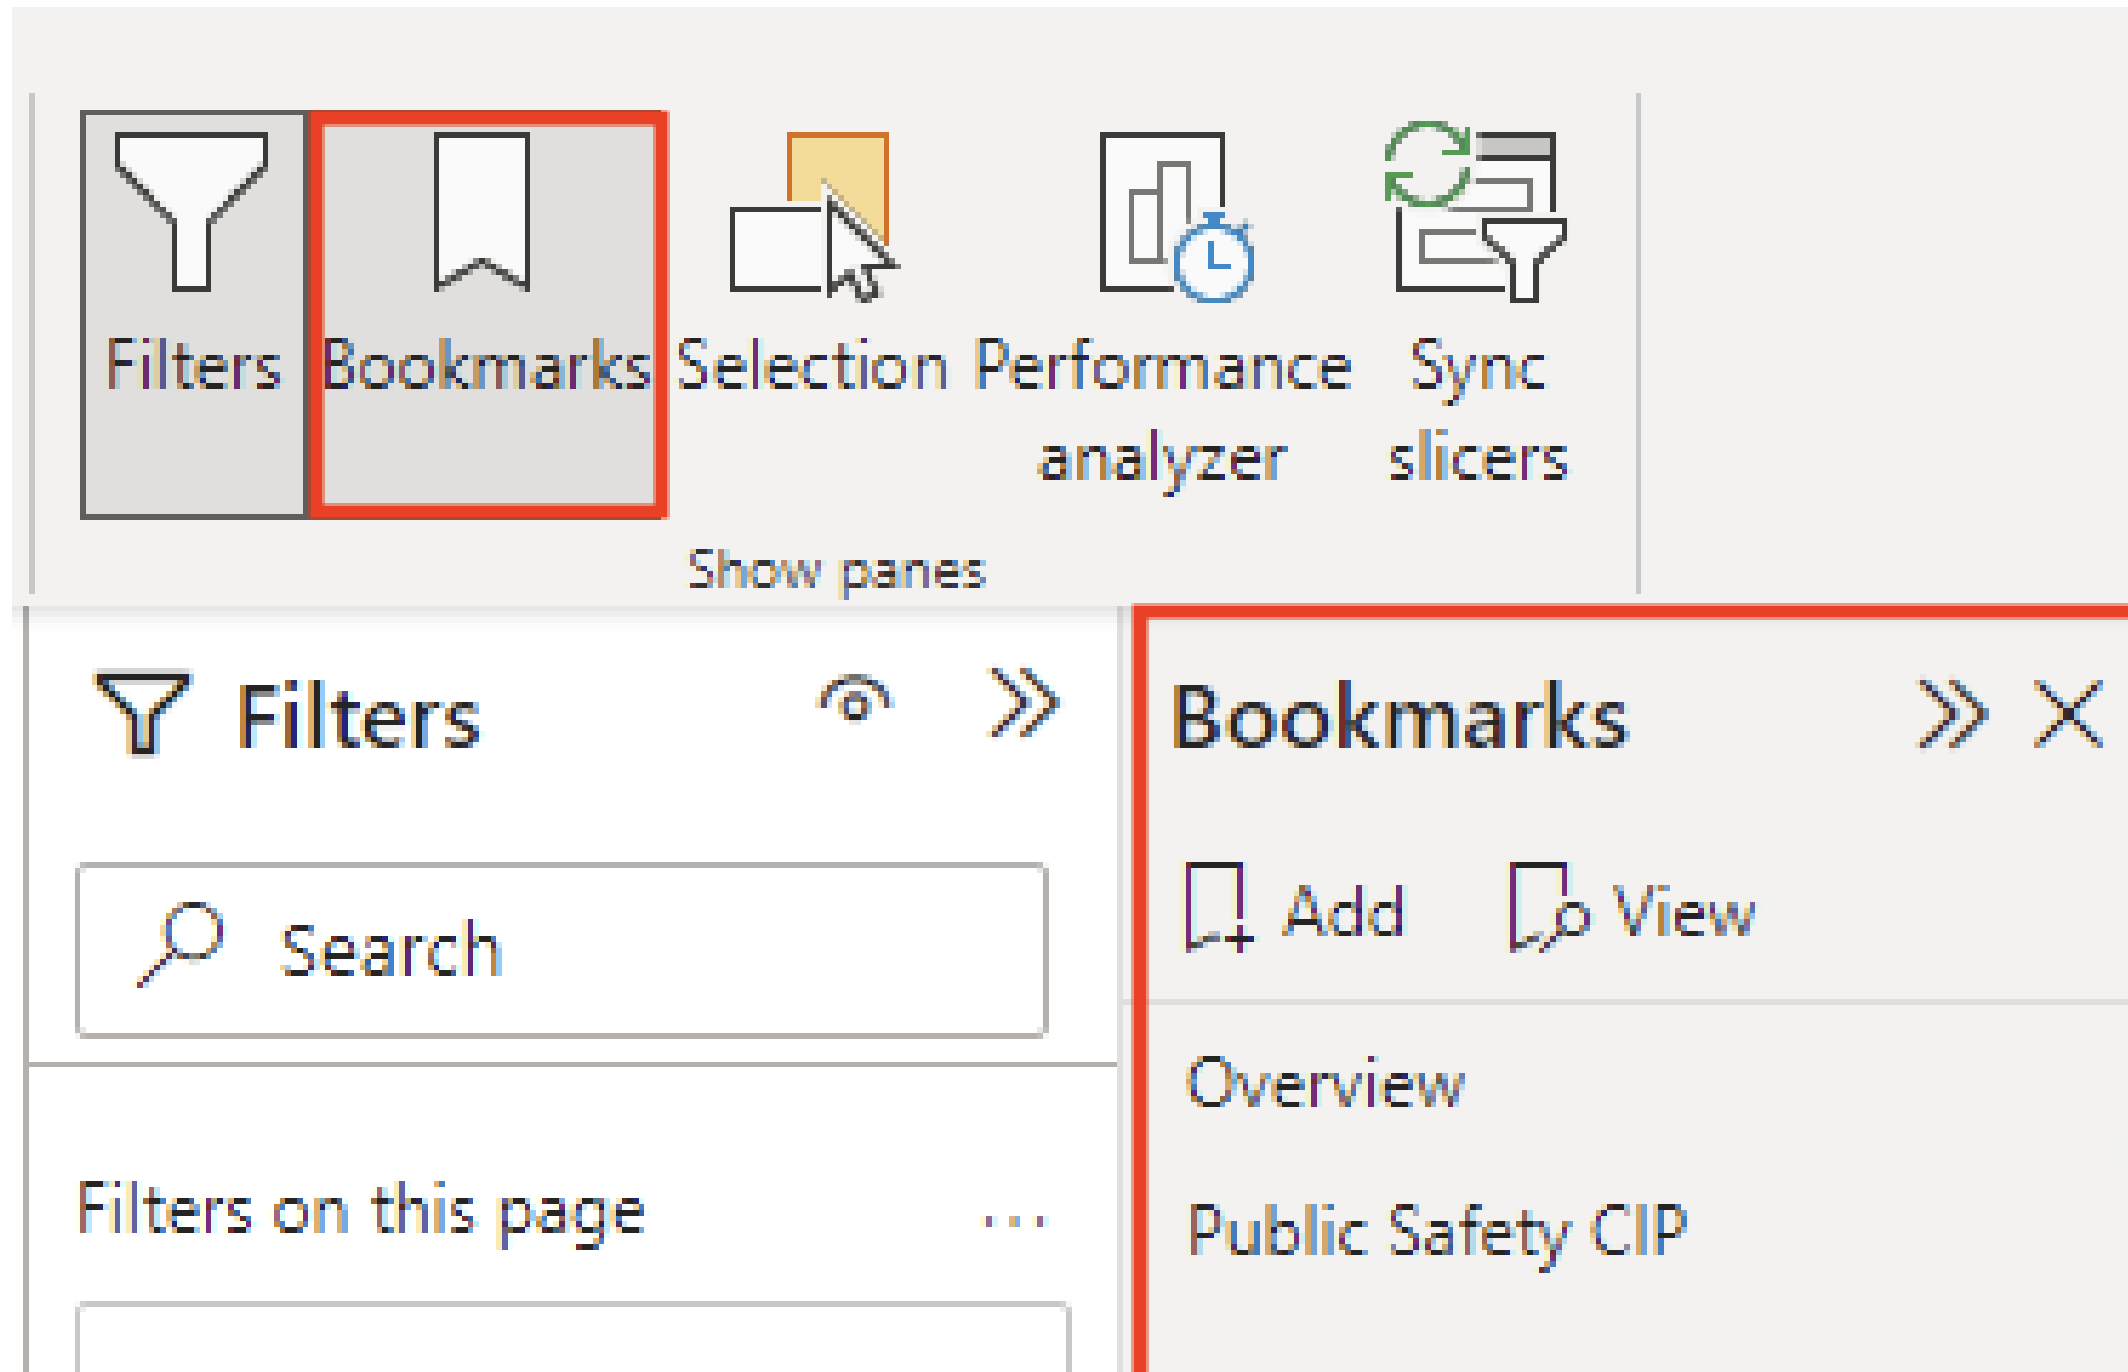

- A way of capturing pre-defined state in Power BI
- Similar to browser bookmarks...
- ...but not the same as browser bookmarks

Bookmarks and state

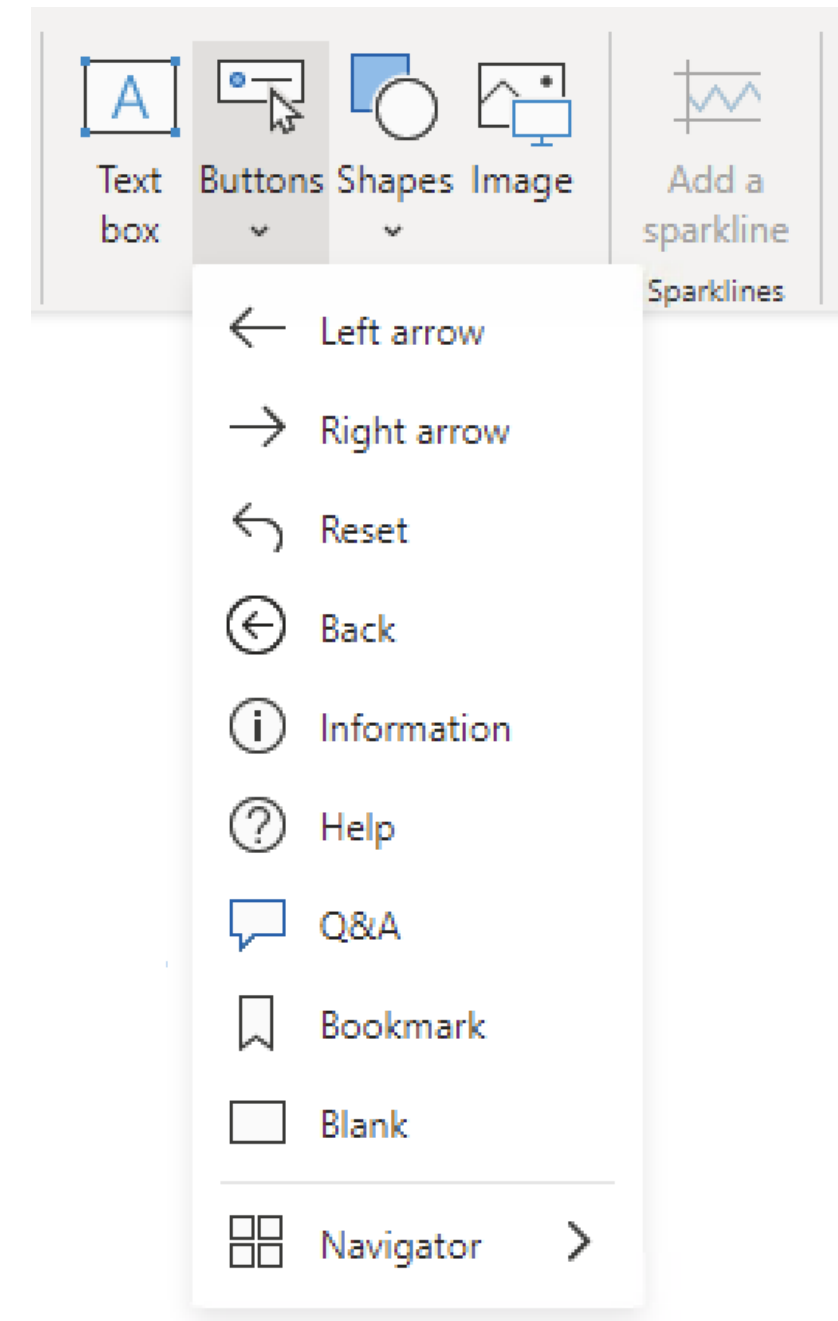

- Currently selected page
- Filter settings
- Slicer selections
- Visual selection state
- Sort order
- Drill location
- Visibility of objects

The bookmark navigator

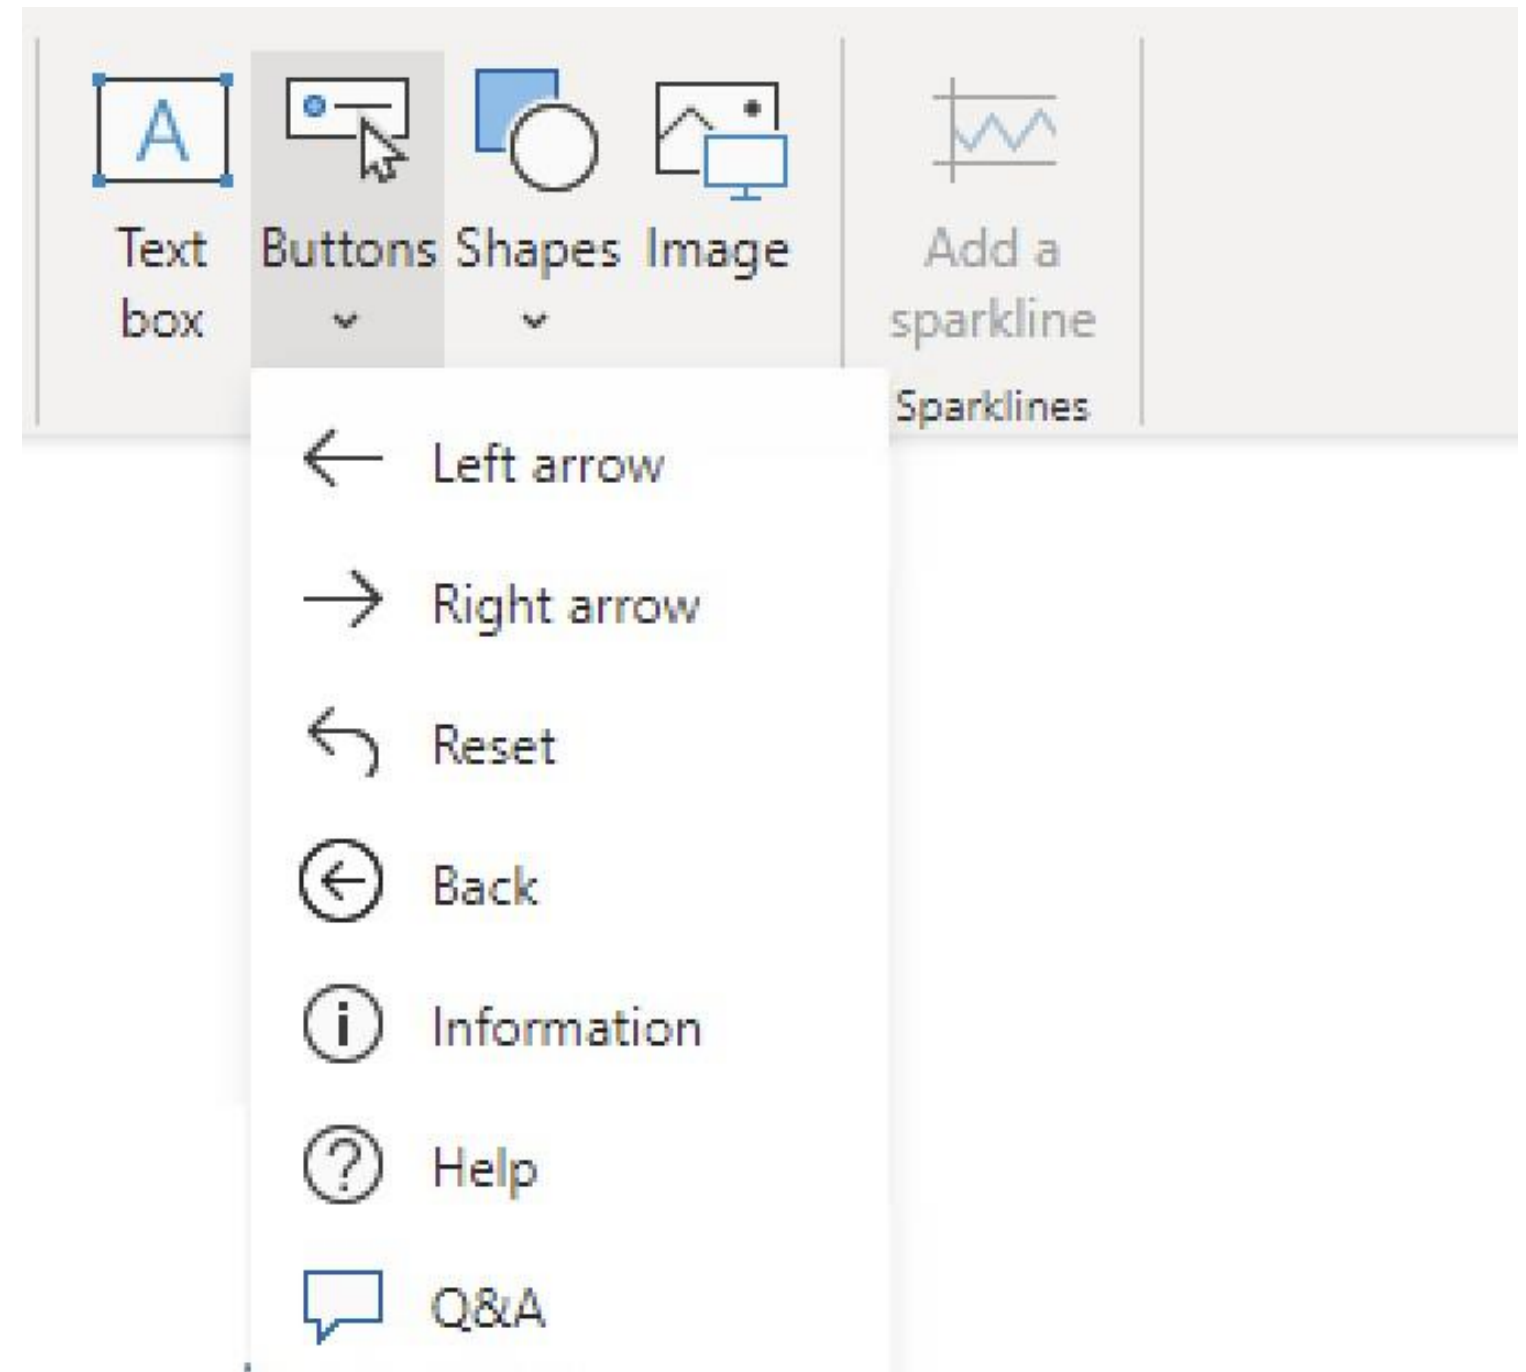

But ons

- Perform actions on pages
- Drill through to a new page
- Navigate to a specific page
- Select a bookmark Navigate to a web URL

Navigator

- Built-in capability
- Automatically create a navigation based of: Bookmarks
 - Pages (including hidden and tooltips)
- Page navigator automatically syncs with your report pages
 - Titles match page display name
 - Matches the order you define Selected
 - button is the current page
 - Automatically updates as you update

Demo

3. Customizing the Experience

But on states and styles

- Four states for buttons: default, on hover, on press, disabled
- Can style button text, icon, outline, and fill based on state
- State does not matter for elements like visual header and action

Custom tooltips

- Power BI page which appears on mouse-over
- Two types: tooltip on item or help tooltip
- NOT interactive

Conditional format ing on tables

Conditional formatting options:

- Background color
- Font color
- Data bars
- Icons
- Web URL

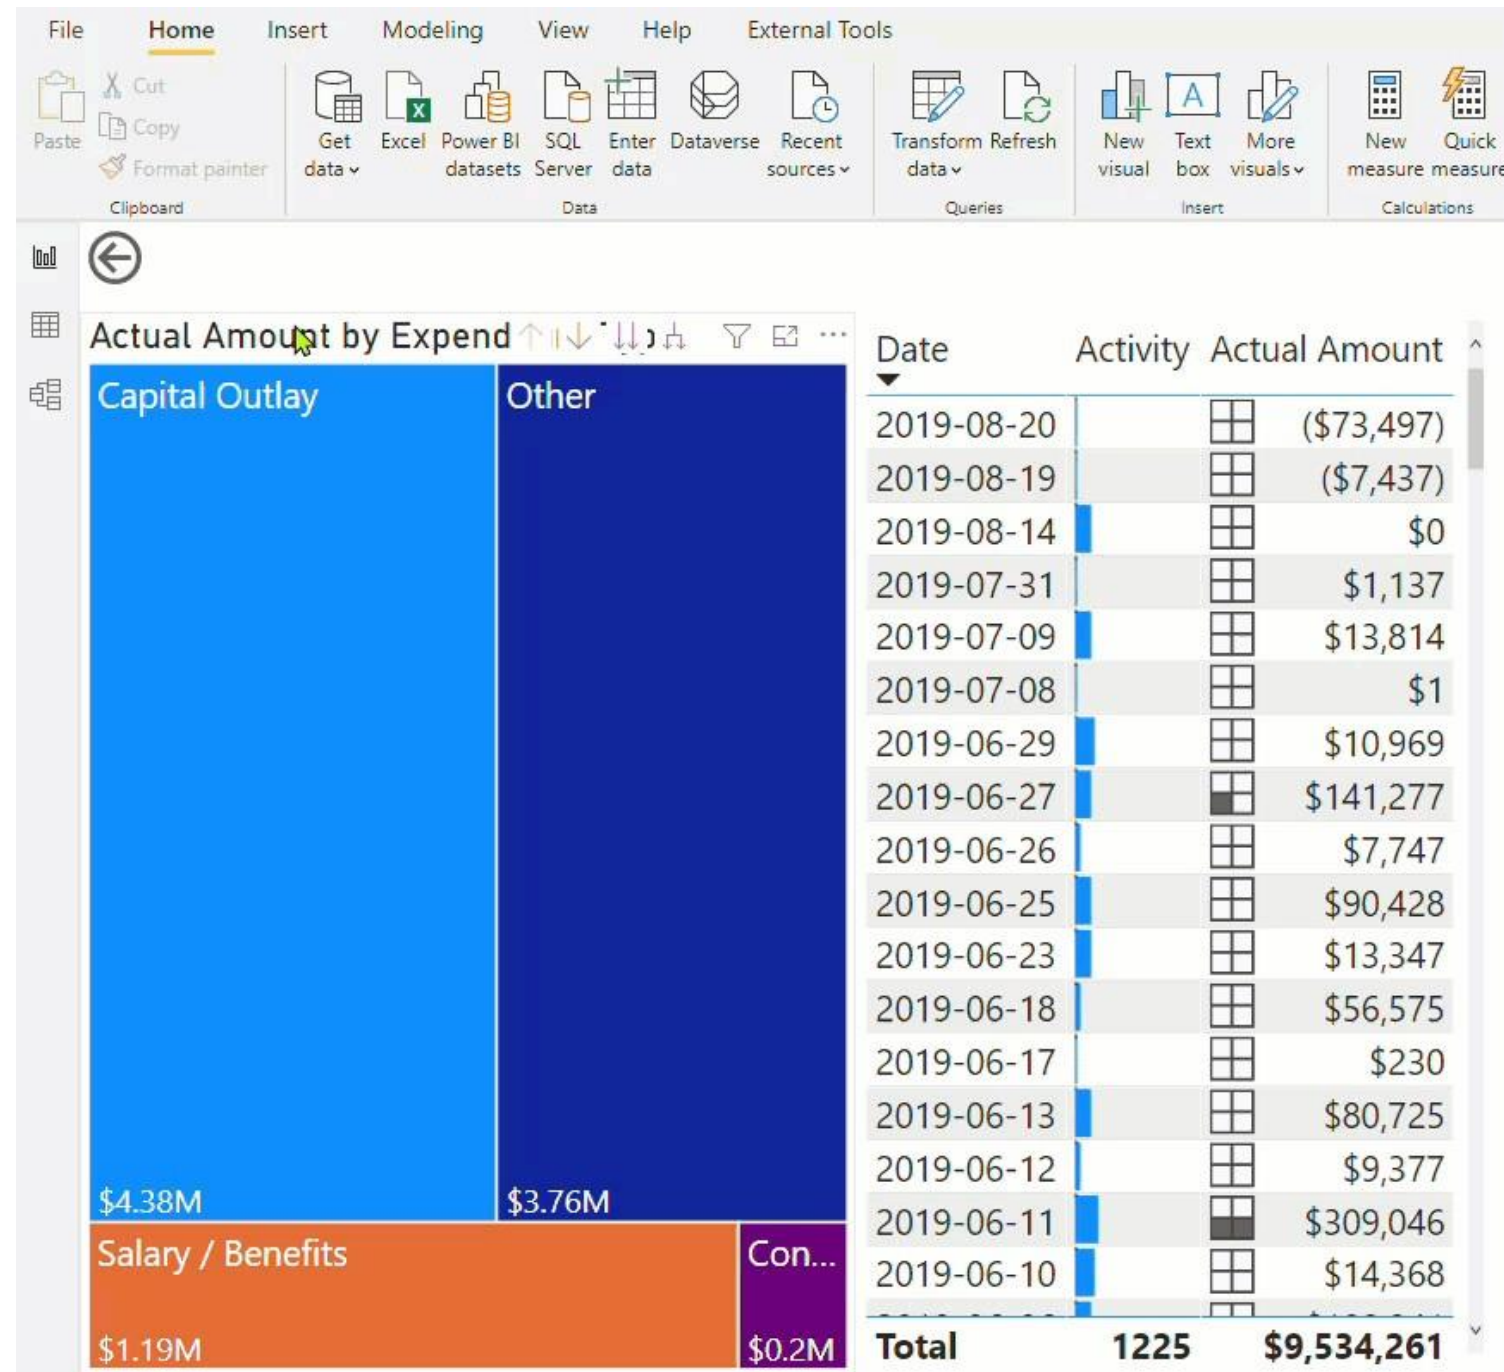

Date	Activity	Actual Amount	
2018-06-30	<div></div>		
2018-07-02	<div></div>		
2018-07-10	<div></div>	<div></div> (\$1,640,021)	
2018-07-15	<div></div>		
2018-07-25	<div></div>	<div></div> \$3,019,417	
2018-07-26	<div></div>	<div></div> (\$1,648,442)	
2018-07-30	<div></div>	<div></div> \$8,836,800	
2018-07-31	<div></div>	<div></div> \$87	
2018-08-01	<div></div>		
2018-08-02	<div></div>		
2018-08-05	<div></div>	<div></div> (\$101)	

Edit interactions

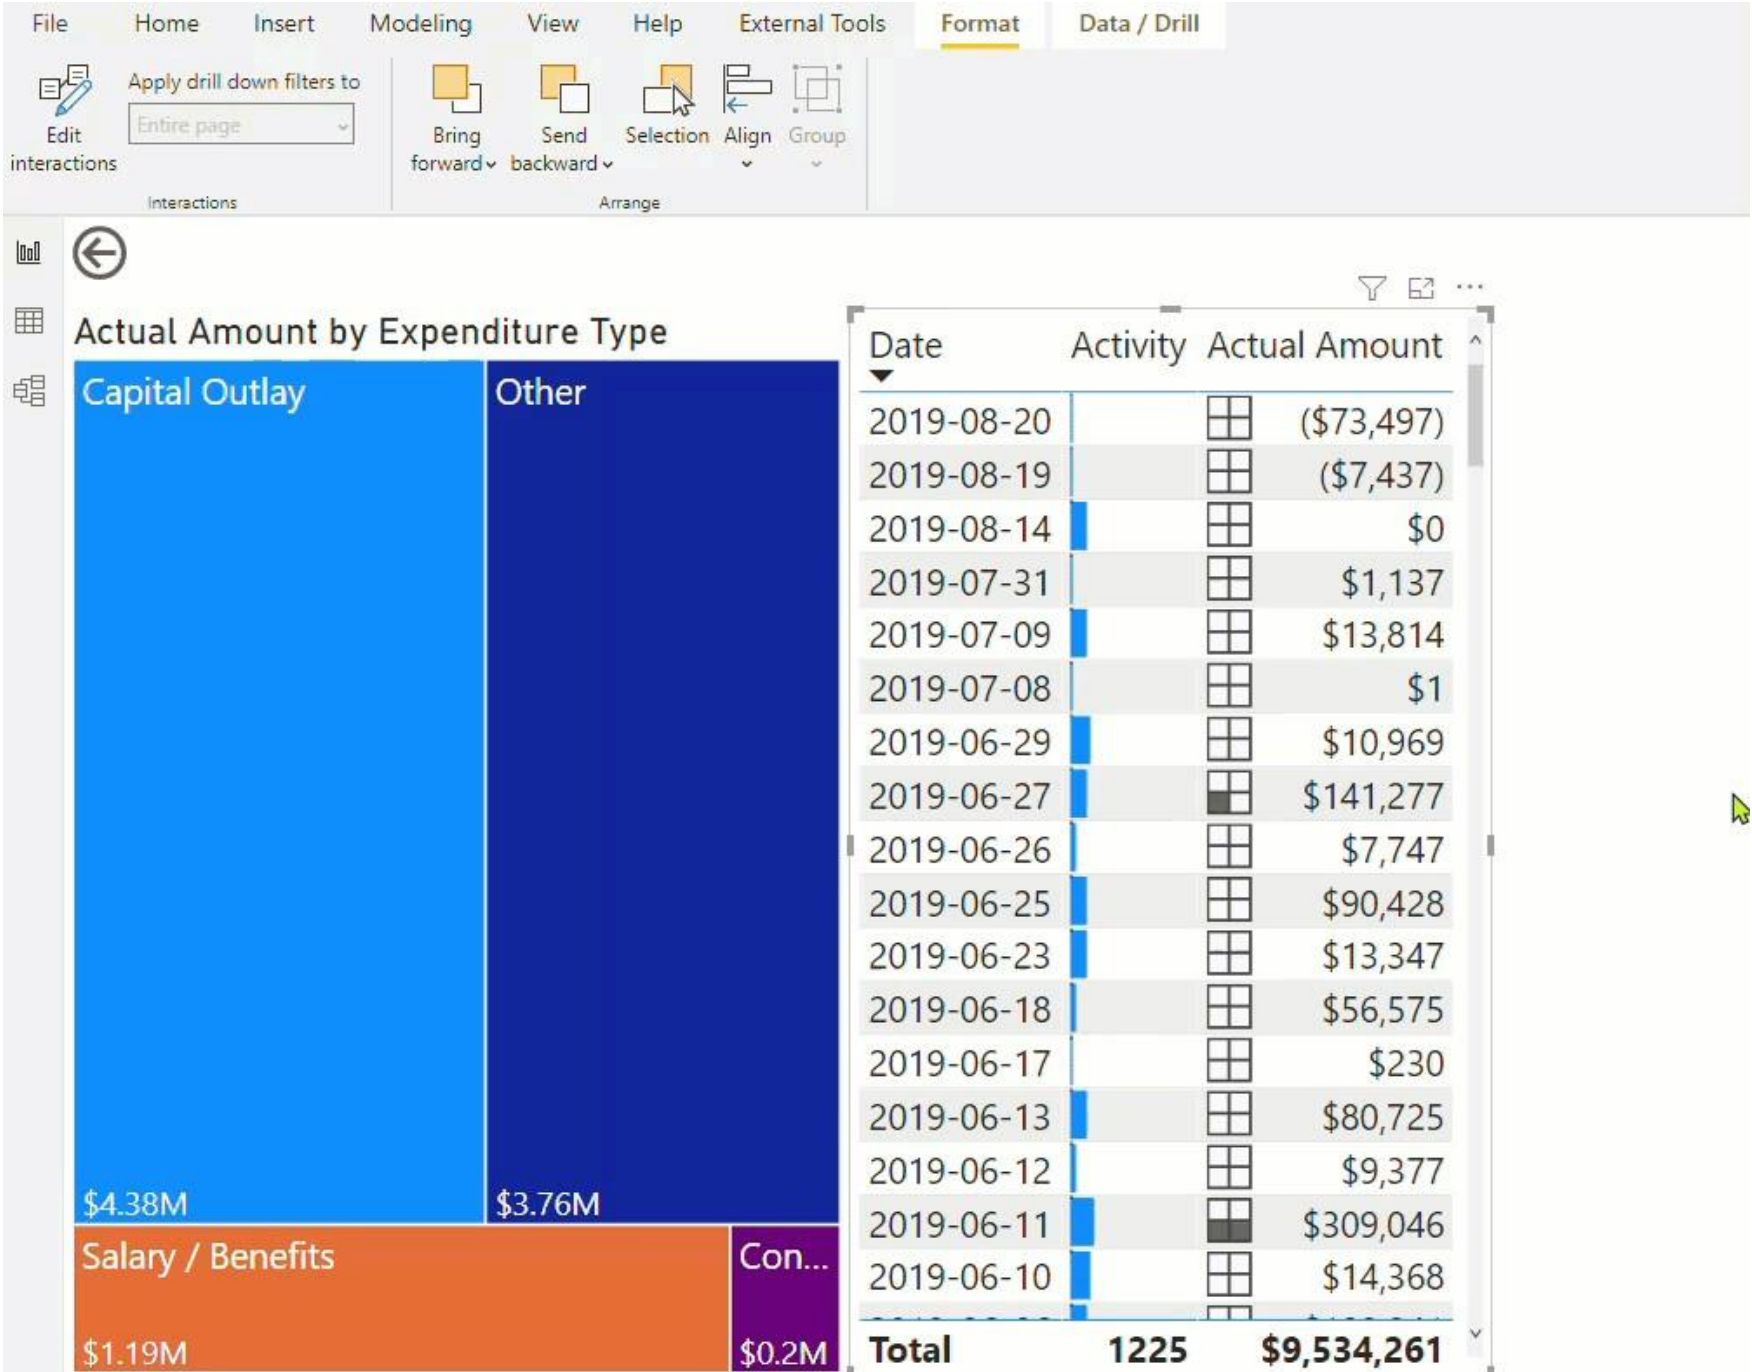

- Enable or disable cross-filtering between specific visuals
- Filter or highlight certain visuals

Edit interactions

- Allow a treemap to drill down for the entire page or just its own visual
- Prevent "totals" cards from updating as a result of slicers or cross-filters

Filter or highlight?

Demo

4. Customize a Report with Q&A

Q&A Capabilities

- Natural language queries (English)
- Auto-complete
- Spelling corrections
- Preview answers
- See words Q&A doesn't understand

How it works

- Ask for a column or measure by name: Actual Amount , Cost Center , Number of Expenditures
- Filtering and grouping with prepositions like for , by , grouped by , and where
- Example query: Actual Amount by Cost Center grouped by Date
- Natural language processing reads the query and decides on the proper visual

Requesting a specific visual

- Use `as {visual name}` to specify a visual
- `as table` , `as treemap` , `as pie chart`
- Limited control over the visual!
- Can convert from Q&A to the visual

Synonyms

Field synonyms

Add terms people might use as synonyms for the fields and tables in your data.

		cost center interpretation + ×	+5				
Department	department ×	dept ×	Add +	subdivision + ×	unit + ×	section + ×	<input checked="" type="checkbox"/>
		branch + ×	sector + ×	+5			
Department Code	department code	Add +		department id + ×	department key + ×		<input checked="" type="checkbox"/>
Division	division	Add +		separation + ×	dissection + ×		<input checked="" type="checkbox"/>
				detachment + ×	disunion + ×		
				partition + ×	+5		

- Multiple terms for the same column
- Use suggested values or define your own
- Treat these like actual column names
- Warning: don't overlap synonyms!

Managing terms with Teach Q&A

Teach Q&A

Teach Q&A to understand questions and terms people might use.

Enter a question about your data using everyday language

Preview your result

Show department sorted by date and that department

Department	Date
City-County Bureau of Identification	2016-06-27
Community Services	2016-06-27
Emergency Management	2016-06-27
General Services Administration	2016-06-27
Human Services Department	2016-06-27
Sheriff	2016-06-27
Wake County Public School System	2016-06-28

- Nouns: fields in the data
- Adjectives: filters for the data

Make Q&A work better

- Name columns and measures in a business-friendly manner: Actual Amount versus amt_act
- Create terms and synonyms as needed
- Provide sample questions for your data (using the Power BI Online service)

Demo

Congratulations!

Reports in Power BI

Chapter 1

- Reports vs. Dashboards vs. Paginated reports
- Increasing report interaction

Chapter 3

- Button customization
- Advanced tooltips

Chapter 2

- Bookmarks and buttons
- Improve navigation

Chapter 4

- Customizing Q&A visual
- Creating Decomposition Trees & Key Influencers visual
